# Transform your Magento store into a powerful B2B platform

The B2B Mage extension enables B2B features in your Magento store and helps you deliver remarkable ecommerce experience to your business buyer!

## What you get:

### **Contact Person and Sales Rep Accounts**

Dedicated accounts for multiple Contact Persons of your Customers. Sales Rep accounts associated with customer accounts so that they can place order for the customer account.

### **Customer specific Catalogue**

Control visibility of product categories to customers. Category specific discounts can be configured for each customer account.

### **Customer specific - product specific price**

Each Customer account can have unique prices for all products. Those prices will be visible only after logging in.

### **Customer specific discount for all products.**

A discount percentage can be set up for each customer account. All products will be offered to the customer based on the specific discount percentage configured.

### **Customer specific tier price**

A quantity based discount can be defined specific to each customer. Magento by default only enables customer group specific tier price.

### **Credit limit as Payment Method**

Credit limits can be maintained for each Customer Account. It can be used as a Payment Method to place an order and the limit would be adjusted with the order value.
