Enable Omnichannel Commerce and Ensure Delightful CX

Efficient and Fast Order Fulfilment:

With INSYNC Commerce, manage complete and end-to-end order lifecycle from a singular B2B eCommerce platform. Enable a streamlined and distributed Order Management system that fulfils complex business requirements and facilitates multiple warehouse options.

Streamlined Distribution Channels

With its integrated B2B eCommerce capabilities, the platform facilitates business scaling by allowing users to manage and sell through various channels: website, physical store and marketplaces.

Cut Down Your Operational Cost.

We Got You Covered for Every Situation.

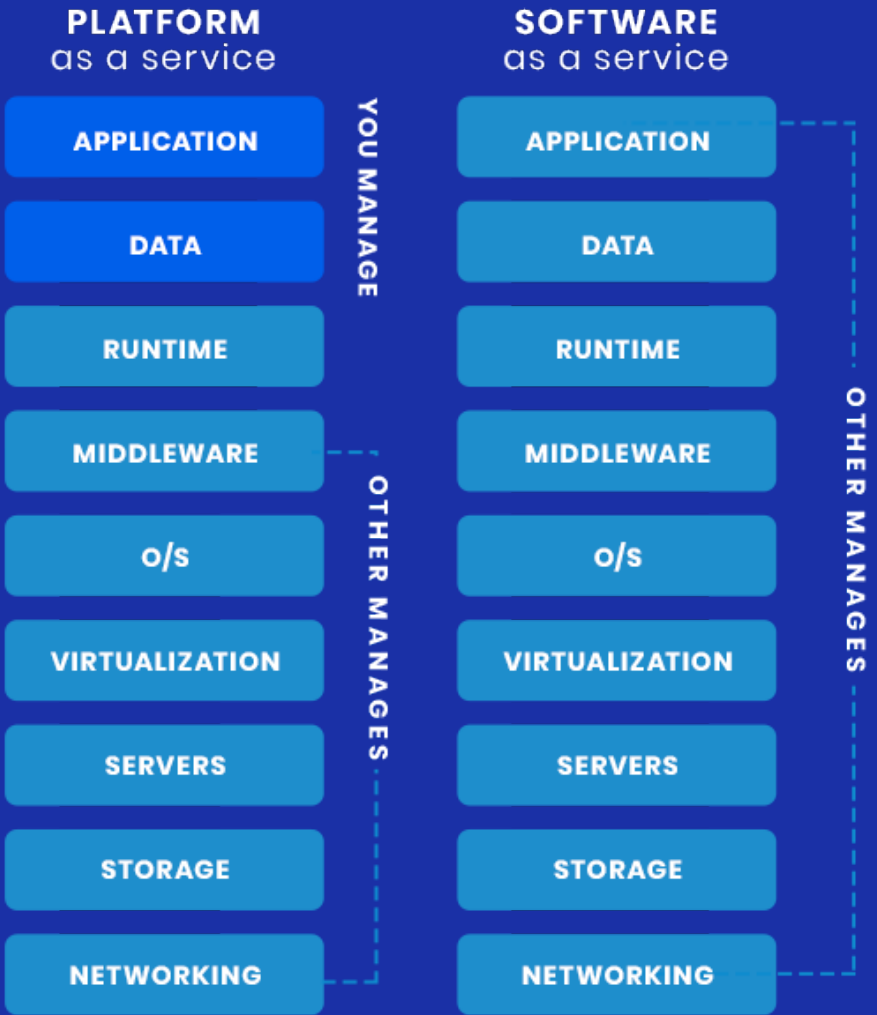

No Platform?	Have a platform but lack of seamless integration?	Got multiple applications and need to connect with eCommerce platform?
INSYNC Commerce offers smart B2B-capable eCommerce platform directly integrated with the other back-end applications.	INSYNC Commerce offers complete bi-directional sync of data and business objects between the applications.	INSYNC Commerce facilitates the streamlined integration of the B2B eCommerce platform with other applications such as CRM, POS, marketplaces, etc.

Why INSYNC Commerce?

INSYNC Commerce is a PaaS not a SaaS
(Powered by Magento)

- Retains the benefit of SaaS - simplified store maintenance
- Does not stay limited to customizations unlike SaaS solutions
- Offers re-built integration with most leading business applications
- Unparalleled ecosystem of extensions and themes to expedite your go-to-market time.
- Out-of-box powerful B2B features for personalized customer experience
- PWA-powered webstores that have the look and feel of native mobile apps
- Professional services and support from a dedicated expert team

Transform the way you work.

Offer personalized experiences to boost your eCommerce sales and ROI. Witness the true power of connected commerce and transform the way your business operates!

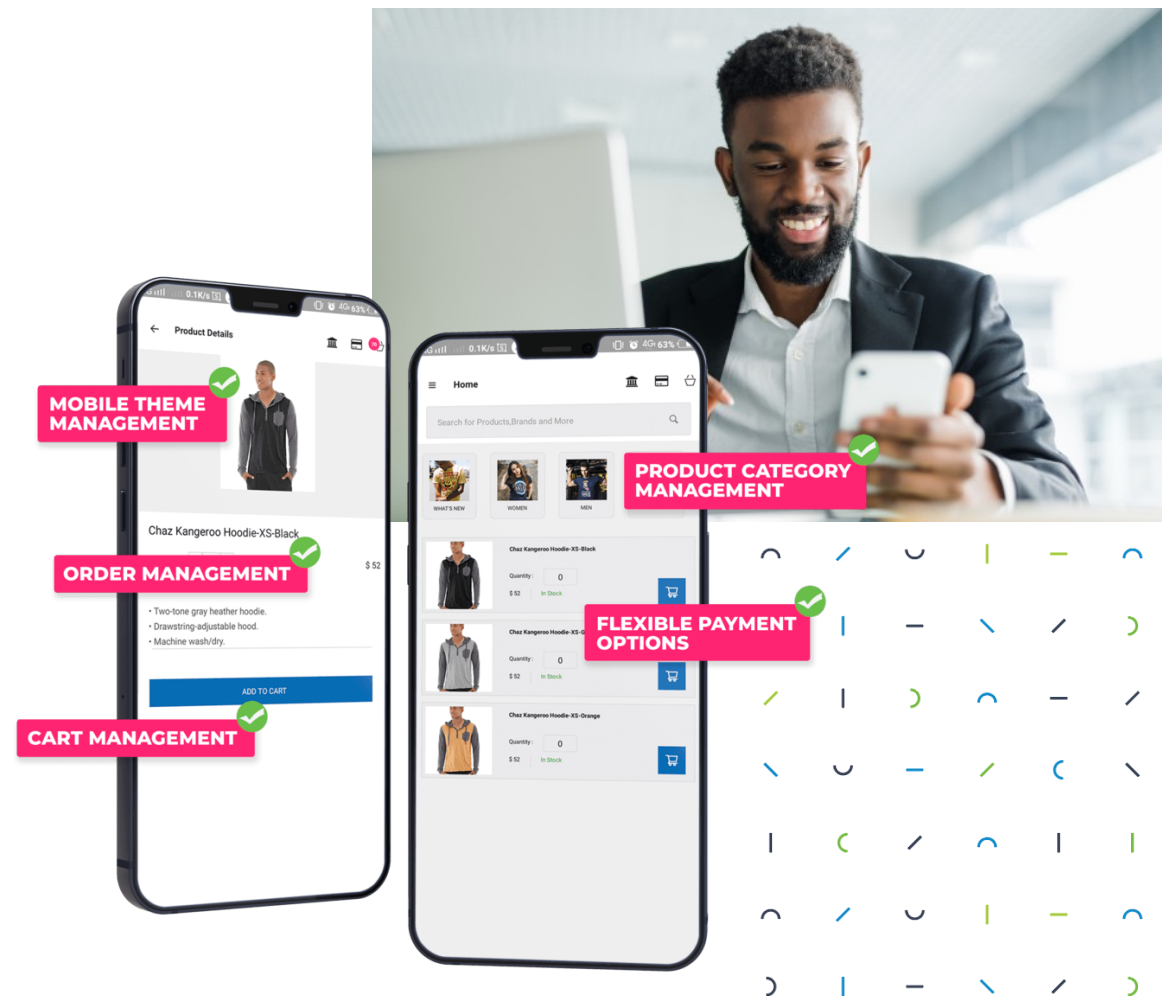

- Move existing customers online and expand your horizons
- Sell on various channels and increase revenue
- Reduce cost and time involved and boost efficiency
- Take control of your inventory turn and cash flow
- Streamline distribution channels into a single sales channel
- Integrate business applications for seamless data transfer

Craft Delightful Digital Experiences with PWA technology

Backed by PWA technology, our B2B eCommerce platform helps you get your digital catalogue online and deliver seamless experiences across all devices.

- **No need to build a separate mobile app**
- **No hassle of developing and hosting an app**
- **Quick implementation and cost effective**
- **Discoverable on search engines, unlike mobile apps**
- **Faster loading times and reduced bounce rates**
- **Better website performance and improved SEO**

Enrich your Customer Experience 5X with a Dedicated Self-Service Portal

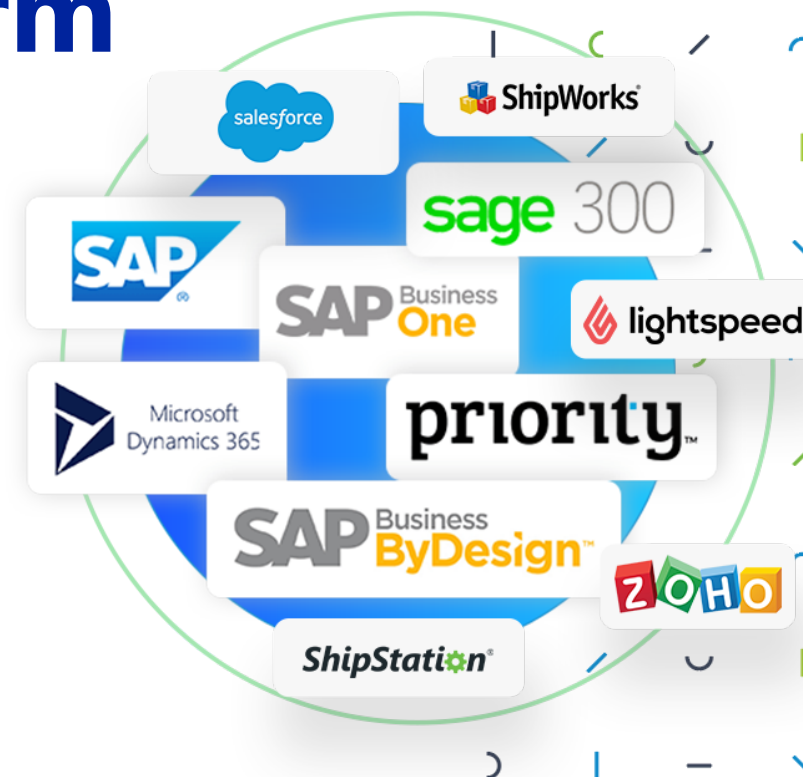

Warranty management is one of the most crucial tasks for B2B businesses. **INSYNC Commerce Service Portal Module** allows B2B merchants to offer a self-service digital support channel to their users. This is a self-service warranty management platform that assists the users to have their products registered for warranty and to claim them for repairs.

Witness the Power of an Integrated and Automated B2B eCommerce Platform

**Integrate an array of business applications and
customize to suit any B2B needs**

With INSYNC Commerce, leverage the facilities of a stable B2B eCommerce platform and experience seamless integration between applications and business processes. Enable automated solution offering, data management and business uniformity across all channels.
